

## Infart 2010 Italy

After the success of the previous editions **Infart** strikes back among the most important European Urban Art festivals. On September 3rd, 4th and 5th, sixty international street-artists will assault Bassano del Grappa in its crucial points: Arena Cimberle Ferrari, Ex Garage Nardini, Castello degli Ezzelini. An invasion consisting of paintbrushes, spray cans, pictures, collages, stencils, sculptures and installations...

During the opening day on September 3rd, together with the exhibition show taking place in the Castello degli Ezzelini, a video installation about the European and international Writing scene will be held through the use of rare archive images. This video installation is curated by Andrea Caputo, creator of All City Writers, a publishing project that recalls 30 years of this movement, starting from its origins in the Bronx of the 70's NY until the explosion of the culture in Europe in the last two decades.
